

# BURNETT NEIGHBORHOOD

## CX<sup>3</sup> Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention

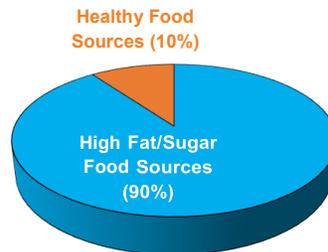

### CX<sup>3</sup> – LBDHHS HEALTHY ACTIVE LONG BEACH PROGRAM

Communities all over the state are working to address key nutrition issues shaping the health of their residents. The City of Long Beach Department of Health and Human Services **Healthy Active Long Beach Program** participated in the CX<sup>3</sup> program to assess neighborhoods in relation to a variety of healthy nutrition and physical activity benchmarks. The program goal is to inspire communities to work with consumers and partners to change their neighborhoods to become healthier places to live.

### RATIO OF HIGH FAT/SUGAR FOOD SOURCES TO HEALTHY FOOD SOURCES\*

\*High fat/sugar food sources include fast-food outlets and convenience stores. Healthy food sources include supermarkets or large grocery stores and farmers markets.

## NEIGHBORHOOD NUTRITION INDICATOR PERFORMANCE

The City of Long Beach Department of Health and Human Services **Healthy Active Long Beach Program** partnered with local residents, students, and community leaders to conduct an audit of nutrition resources in the Burnett Elementary neighborhood in the summer of 2010.

A wide range of indicators were used to understand Burnett Elementary School's nutrition environments. Using Geographic Information Systems software, local knowledge of the neighborhood, site visits, interviews and store surveys, Healthy Active Long Beach staff and volunteers examined factors ranging from healthy food access and availability to marketing practices and product quality.

This data provides a realistic picture of areas in need of improvement and offers residents, merchants, decision makers, health advocates and neighborhood groups a focal point as they work to build a healthier community.

On the back is a brief summary of a few of the neighborhood indicators included in the audit.
