

**CITY OF LONG BEACH
CLASSIFICATION SPECIFICATION**

TITLE: BUSINESS SYSTEMS SPECIALIST I-VI

DEFINITION: Under supervision, performs specialized technical work pertaining to applications programming and analysis, system software/hardware analysis and design, and system administration and support activities.

DISTINGUISHING CHARACTERISTICS:

- Grade Level I - Under immediate supervision, performs general technical work pertaining to less difficult applications programs, and learns systems analysis and design techniques, supports the Geographic Information System, or maintains and supports computer hardware and software applications.
- Grade Level II - Under general supervision, performs specialized technical work pertaining to moderately difficult applications programs, and assists in systems analysis and design activities.
- Grade Level III - Under direct supervision, performs specialized technical work pertaining to the preparation and responsibility for complex applications programs, and performs basic systems analysis and design activities.
- Grade Level IV - Under limited supervision, performs highly specialized technical work pertaining to the preparation and responsibility for very complex applications programs, and performs major systems analysis and design activities. May direct the work of lower level technical staff or contractors.
- Grade Level V - Under limited supervision, plans, develops, implements and leads systems work which enhances end user productivity and effectiveness, provides specialized technical advice, leads efforts of project teams, promotes internal development of systems and resources, and provides technical analysis and counsel to decision makers and business leaders. Grade V requires a four-year college degree with major coursework in computer science or related field and two years related experience. Six years of related experience may be substituted for the education and experience requirement.
- Grade Level VI - Under general direction, provides highly specialized technical advice and consulting services to business units within the City, leading efforts of project teams, promoting internal development of systems and resources, and providing technical analysis and counsel to decision makers and business leaders. Grade VI requires a four-year college degree with major coursework in computer science or related field and two years related experience. Six years of related experience may be substituted for the education and experience requirement.
