Summary of Accessibility Upgrades for Commercial Projects

Information
Bulletin

BU-005

Eff: 01-01-2013
Rev: 01-18-2018

The provisions of the 2016 California Building Code (CBC) §11B-202.4, Exception 8, apply to existing buildings or facilities used as public buildings, public accommodations, commercial buildings or public housing. When these buildings or facilities undergo alterations, structural repairs, or additions, an accessible path of travel must be provided to the specific area of construction.

Within three years of the original alteration, when the adjusted construction cost¹ of **alterations, structural repairs, or additions to existing buildings and facilities** does not exceed a valuation threshold of **\$161,298.00**, the cost of compliance with CBC §11B-202.4 shall be limited to 20% of the adjusted construction cost of alterations, structural repairs, or additions.

In choosing which accessible elements to provide, priority shall be given to those elements that will provide the greatest access in the following order:

1. An accessible entrance;
2. An accessible route to the area of alteration, structural repair, or addition (see CBC §202 & 11B-206.2.1 for more information on accessible routes and site arrival points);
3. At least one accessible restroom for each sex or a single accessible unisex restroom serving the area of alteration, structural repair or addition;
4. Accessible telephones, if provided, serving the area of alteration, structural repair, or addition;
5. Accessible drinking fountains, if provided, serving the area of alteration, structural repair, or addition; and/or
6. When possible, additional accessible elements such as parking, storage, and alarms.

An example of a completed Summary of Accessibility Upgrades for Commercial Projects form is shown on page 2.

¹ Adjusted cost of construction does not include the cost of alterations to path of travel elements required to be upgraded outside the area of alteration, structural repair, or addition.
