

**This Measure will undermine the Auditor of the power of oversight.**

**What is the City trying to get away with?**

**The Auditor already has access to all documents.**

**This Amendment will strike out the word "IMMEDIATE" substitute with "TIMELY" for access to all documents.**

**Anyone who has tried to get information from the City of Long Beach knows that "timely", means at the City's Will. Small things, one hour, large issues, it could be months. The Auditor already has access to all financial documents. The auditor is required to stay vigilant for the people and ascertain that the City is complying with all reporting and financial obligations. We must maintain the WARRANT power of the office for everything without delay from any department, commission, committee or position of the City.**

**The Auditor is elected by the people to be an independent nonpartisan watchdog on the actions of the City, a protector of public trust and confidence in government, not a rubber-stamping bureaucrat.**

**It is your choice. Shall we amend the charter to remove the Power of the Auditor, or will we let possible corruption, secret meetings, undisclosed plans, and fraud flourish in our City?**

**The elected office of City Auditor serves The People not the staff and politicians.**

**VOTE NO ON MEASURE AAA**
