Shoreline Gateway Tops Out

Touted as the East Gateway into Downtown Long Beach, Shoreline Gateway is considered to be the tallest building in the City of Long Beach. Co-developers Ledcor Properties Inc. and Anderson Pacific LLC, and with their partners Qualico and Lantower Residential broke ground on the 35-story building in September of 2018. Today, the tower is almost completed and will housing 315 luxury market-rate residential units as well as 6,500 sq. ft. of retail space. This project is set to open in early 2021.

Shoreline Gateway will service as a signature iconic waterfront tower that offers unparalleled 360-degree views of Long Beach, Catalina Island, Orange County and Downtown Los Angeles. Once completed, it will be one of only two coastal high-rise apartment buildings in Los Angeles County.
