

Debt Management

DEBT MANAGEMENT

The Financial Management Department, Treasury Bureau, is responsible for issuing debt on behalf of City departments, City agencies, assessment districts, community facilities districts and other qualified entities. Typical debt structures include revenue bonds, lease revenue bonds, land based financings and notes. Debt may be issued with fixed or variable rate interest structures. Approximately \$2.0 billion in debt was outstanding as of September 30, 2013. However, \$621 million of this debt is related to the Gas Prepay, which is guaranteed by Merrill Lynch, Inc., even though it is issued out of the Long Beach Bond Finance Authority (LBBFA).

Central to debt management is ensuring the City's compliance with Federal, State and local regulations. Other duties of this function include trustee services, preparation of Securities and Exchange Commission and Internal Revenue Service reports, determining annual assessment levies and approving the distribution of bond proceeds.

SUMMARY OF THE CITY AND RELATED AGENCIES OUTSTANDING DEBT

The tables below summarize the City's outstanding debt, including final maturities, original par amounts and amounts outstanding. All information is presented as of September 30, 2013.

The Government Code of the State of California provides for a legal debt limit of 15 percent of gross assessed valuation. This provision was enacted when assessed valuation was based on 25 percent of market value. Effective with fiscal year 1982, each parcel is assessed at 100 percent of market value (as of the most recent change in ownership for that parcel). The computations shown above reflect a conversion of assessed valuation data for each fiscal year from the current full valuation perspective to the 25 percent level that was in effect at the time that the legal debt margin was enacted by the State of California for local governments located within the state.
