Project Location: Regionally, the project site is located within the southwestern portion of the City of Long Beach, Los Angeles County, California. Locally, the project site is situated along the east and west sides of the Los Angeles (LA) River, and generally extends a distance of approximately 8 miles from State Route 91 (SR-91) to the north to approximately 0.1-mile south of Ocean Boulevard to the south.

Project Description: The City of Long Beach is situated at the confluence of the LA River. Currently, substantial quantities of pollutants (metals, bacteria, hydrocarbons, pesticides, and trash) enter the LA River via urban runoff and accumulate in the Long Beach Harbor. Runoff includes water draining from urban uses such as streets, parking lots, driveways, and lawns that flow through the storm drain system. The Long Beach MUST Project would divert and convey dry-weather and "first-flush" storm flows to the treatment facility prior to discharge into the LA River, resulting in water quality benefits in the project area.

This is to advise that the Long Beach City Council has carried out the above-described project on January 23, 2018 and has made the following determinations regarding the above-described project:

1. The project [___ will ___ X ___ will not] have a significant effect on the environment.
