

JUNIOR LIFEGUARD STATION FACILITY REBUILD

City of Long Beach Construction Notice

The City of Long Beach is scheduled to begin construction of the Junior Lifeguard Station Facility in mid to late November 2022. Barring weather or other unforeseen delays, construction is scheduled to be completed in approximately five months. The proposed project involves construction of a one-story modular building with a second level viewing deck, stingray response room, lockers, and office on the beach near Claremont Place adjacent to the existing launch ramp and public restroom. Construction activities includes construction of a new foundation, installation of the modular building structure, and new utilities, as well as demolition of the existing Lifeguard Building.

Beginning the week of November 13, 2022, the City's contractors are scheduled to mobilize construction equipment and fencing. Construction is anticipated to begin late November and work will occur between **Monday through Friday from 6:00 AM to 3:00 PM**. Minor disturbance of the 54th and Claremont Place parking lot would be expected as the contractors make utility connections. While efforts will be made to minimize inconveniences during construction, we appreciate your patience and cooperation throughout this project.

- Contractor Mobilization (Site Fencing): Fall 2022
- Utilities: Fall 2022
- Sitework: Winter 2022
- Foundation: Winter 2022 to Spring 2023
- Modular Building Placement: Spring 2023
- Existing Facility Demolition: Spring 2023

Note: all times are estimated barring any unforeseen weather changes.
